

REBATES ELIGIBLE MEASURES

Weatherization:

- Air Curtain
- Window Replacement
- Window Insert
- Doors
- Roof Insulation
- Exterior Wall Insulation
- Air Sealing

Heating Electrification:

- Central Ducted Heat Pump
- Ductless MSHP – Air Source
- SPVHP – Air Source
- Heat Pump – Unitary & Applied
- Heat Pump Water Heater
- Ground Source
- Packaged Terminal Heat Pump

BENEFITS

Weatherization:

- Increased Building Sustainability
- Decreased Maintenance Costs

Heating Electrification:

- Enhanced Indoor Air Quality
- Increased Comfort and Convenience
- Improved Energy Efficiency

“Bundle Up” Bonus: Customers who install a heat pump and complete qualifying weatherization measures within the same project **may be eligible for a \$6,500 bonus.**

CONTRACTOR STEPS

*Rebate will be issued to the contractor only when the customer has formally assigned rebate rights to the contractor through a signed agreement. Projects may require post inspection.

ELIGIBILITY CRITERIA

Note: Each category may have additional eligibility criteria than what is shown below.

Electric (Upstate New York) Customers must:

- Be an active National Grid electric non-residential customer;
- Have an average annual peak demand under 250 kW;
- Pay into SBC (Systems Benefit Charge) surcharge on the bill.

Gas (Upstate New York) Customers must:

- Be an active National Grid gas non-residential customer;
- Have an annual Therm usage of less than 50,000Therms;
- Pay into SBC (Systems Benefit Charge) surcharge on the utility bill.

“Bundle Up” Bonus: Customers who install a heat pump and complete qualifying weatherization measures within the same project may be eligible for a \$6,500 bonus. To qualify, the project must meet the equipment requirements of the Small Business Heating Electrification and Weatherization Programs, and the incentive is issued only after a satisfactory post-installation inspection for both the heat pump and the weatherization work. Qualifying weatherization measures for the bundle up incentive are roof, attic, and wall insulation.

National Grid Upstate New York (UNY) Small-Medium Commercial & Industrial (C&I) Heating Electrification and Weatherization Incentive Eligibility Matrix

Project Type	Customer's National Grid Service		
	Electric-Only	Gas-Only	Gas & Electric
Installation of Weatherization Only	Criteria: Primary Heating System Is Electric Or Delivered Fuel	Criteria: Primary Heating System Uses Natural Gas	Whichever Utility (Gas Or Electric) Drives The Heating System Is Where They Are Eligible
	Eligibility: All UNY Electric Wx Measure Incentives	Eligibility: All UNY Gas Wx Measure Incentives	
Installation of Heat Pump Only	Eligible For Heating Electrification Incentives	Not Available	Eligible For Heating Electrification Incentives
Installation of Weatherization and Heat Pump	Eligible for UNY “Bundle Up” Enhanced Incentives	Not Available	Eligible for UNY “Bundle Up” Enhanced Incentives

Projects must adhere to program caps and limits.
